

Sponsor Prompt Guide:

Company	A Little Bit of Hope
Category	Cybersecurity
Target Audience	- Who is the prompt targeted towards? Talented individuals seeking to solve potentially complex cybersecurity problems
Description of Prompt	Title: Secure Healthcare Data Management Challenge: Develop a system or application that secures the storage and retrieval of sensitive patient health information while maintaining the ability to share it across different platforms. The system must: • Be secure, examples below: ○ Password protected ○ 2 Factor Authentication (2FA) ○ SSL • Be compliant with regulations such as HIPPA • Have a user-friendly interface ○ Should be able to login ○ Easy navigation ○ Straightforward design • Be able store and retrieve data securely, examples below ○ Encryption ○ RBAC
Deliverables	• Presentation • Workflow/Architecture Diagram • Demo of a system that meets the requirements listed
Suggested Languages/Frameworks/Tools	• What tools or resources will participants need to complete the task? ○ Preferred programming language ○ Information on HIPPA ○ Helpful Links: ▪ HIPPA Privacy Rule ▪ HIPPA General Information • Will participants have access to any specific APIs, datasets, or software provided by your company? ○ No
Midpoint Judging/Check-In	Office Hours Timeslot (TBD)

Submission Expectations	Link to GitHub, Presentation, Workflow/Architecture Diagram
Category Judges <i>tentative</i>	Zay Ragland, Kincaid Keating, Floyd Smith, Amanda White

Evaluation Criteria:

Proposed System:

1. Security of Data (25 points)

- Superior (25-21): Demonstrates outstanding use of security techniques for data both in transit and at rest. Utilizes the most up-to-date and secure encryption methods.
- Above Average (20-16): Demonstrates proficient use of security techniques for data both in transit and at rest. Uses secure methods.
- Average (15-11): Demonstrates acceptable use of security techniques, with minor issues or lapses.
- Below Average (10-6): Demonstrates inadequate or incorrect use of security techniques. There are significant issues or lapses.
- Poor (5-1): No or minimal use of security techniques.

2. Regulatory Compliance (25 points)

- Superior (25-21): Demonstrates excellent understanding and incorporation of regulations like HIPAA into the system design.
- Above Average (20-16): Demonstrates good understanding of regulations, with few minor non-compliance issues.
- Average (15-11): Demonstrates basic understanding of regulations, with several non-compliance issues.
- Below Average (10-6): Demonstrates limited understanding of regulations, with significant non-compliance issues.
- Poor (5-1): Does not demonstrate understanding of regulations. Non-compliant system design.

3. User-Friendly Interface (25 points)

- Superior (25-21): System interface is intuitive, user-friendly, and facilitates easy navigation and operation.
- Above Average (20-16): System interface is mostly user-friendly with minor issues in navigation or operation.
- Average (15-11): System interface is somewhat user-friendly but may have several issues impacting navigation or operation.
- Below Average (10-6): System interface is poorly designed, causing significant issues in navigation or operation.
- Poor (5-1): System interface is not user-friendly, causing substantial navigation or operation difficulties.

Total: 75 Points

Presentation

1. Understanding of the Topic (20 Points)

- Superior (20-16): Demonstrates a comprehensive understanding of secure healthcare data management concepts, providing detailed explanations and examples.
- Good (15-11): Shows a good understanding of secure healthcare data management concepts but may lack some details or examples.
- Fair (10-6): Provides a basic understanding of secure healthcare data management concepts but may need more clarification or details.
- Poor (5-1): Fails to demonstrate an understanding of secure healthcare data management concepts or provides incomplete or inaccurate information. (20% of total points)

2. Explanation of the System (20 Points)

- Superior (20-16): Provides a detailed and effective explanation of the proposed system or application, including its features and benefits.
- Good (15-11): Offers a good explanation of the proposed system or application but may lack some details or clarification.
- Fair (10-6): Provides a basic explanation of the proposed system or application but may need more details or clarification.
- Poor (5-1): Fails to provide an explanation of the proposed system or application or provides incomplete or inaccurate information.

3. Security (20 Points)

- Superior (20-16): Provides a detailed explanation of how the system will secure data both in transit and at rest.

- Good (15-11): Offers a good explanation of how the system will secure data but may lack some details or clarification.
- Fair (10-6): Provides a basic explanation of how the system will secure data but may need more details or clarification.
- Poor(5-1): Fails to provide an explanation of how the system will secure data or provides incomplete or inaccurate information.

4. Compliance (15 Points)

- Superior (15-11): Provides a detailed explanation of how the system will be compliant with healthcare regulations, including the specific regulations and requirements.
- Good (10-6): Offers a good explanation of how the system will be compliant with healthcare regulations but may lack some details or clarification.
- Fair (5-1): Provides a basic explanation of how the system will be compliant with healthcare regulations but may need more details or clarification.
- Poor (0): Fails to provide an explanation of how the system will be compliant with healthcare regulations or provides incomplete or inaccurate information.

5. User Interface (15 Points)

- Superior (15-11): Provides a detailed explanation of the user interface design and how it is user-friendly, including the layout, navigation, and features.
- Good (10-6): Offers a good explanation of the user interface design and how it is user-friendly but may lack some details or clarification.
- Fair (5-1): Provides a basic explanation of the user interface design and how it is user-friendly but may need more details or clarification.
- Poor: Fails to provide an explanation of the user interface design and how it is user-friendly or provides incomplete or inaccurate information. (15% of total points)

6. Presentation Skills (10 Points)

- Superior(10-6): Demonstrates excellent presentation skills, including clear and concise communication, effective use of visual aids, and active engagement with the audience.
- Good(5-1): Offers good presentation skills but may lack some effectiveness in one or more areas.
- Poor(0): Fails to demonstrate effective presentation skills, including unclear or confusing communication, inappropriate use of visual aids, and lack of engagement with the audience.

Total: 100 Points
